Much of the language reflected in the contract is required by statute. This indemnification survives Minnesota State's award of a contract. In submitting a response to this RFP, the responder agrees this indemnification survives as long as the trade secret materials are in possession of Minnesota State.

Minnesota State will not consider the prices submitted by the Responder to be proprietary or trade secret materials.

Organizational Conflicts of Interest

The responder warrants that, to the best of its knowledge and belief, and except as otherwise disclosed, there are no relevant facts or circumstances that could give rise to organizational conflicts of interest. An organizational conflict of interest exists when, because of existing or planned activities or because of relationships with other persons, a vendor is unable or potentially unable to render impartial assistance or advice, or the vendor's objectivity in performing the contract work is or might be otherwise impaired, or the vendor has an unfair competitive advantage. The responder agrees that, if after award, an

organizational conflict of interest is discovered, an immediate and full disclosure in writing must be made to the respective school's chief financial officer or the System Office's Business Manager that must include a description of the action which the vendor has taken or proposes to take to avoid or mitigate such conflicts. If an organizational conflict of interest is determined to exist, the school or System Office may, at its discretion, cancel the contract. In the event the responder was aware of an organizational conflict of interest prior to the award of the contract and did not disclose the conflict to the contracting officer, the school or System Office may terminate the contract for default. The provisions of this clause must be included in all subcontracts for work to be performed similar to the service provided by the prime contractor, and the terms "contract," "contractor," and "contracting officer" modified appropriately to preserve Minnesota State's rights.

Physical and Data Security

The vendor is required to recognize that on the performance of the contract the vendor will become a holder of and have access to private data on individuals and nonpublic data as defined in the Minnesota Government Data Practices Act, Minnesota Statutes Chapter 13; and other applicable laws.

In performance of the contract, the vendor agrees it will comply with all applicable state, federal and local laws and regulations, including but not limited to the laws under Minnesota Statute Chapters 13 relating to confidentiality of information received as a result of the contract. The vendor agrees that it, its officers, employees and agents will be bound by the above confidentiality laws and that it will establish procedures for safeguarding the information.

The vendor agrees to notify its officers, employees and agents of the requirements of confidentiality and of the possible penalties imposed by violation of these laws. The vendor agrees that neither it, nor its officers, employees or agents will disclose or make public any information received by the vendor on behalf of Minnesota State and System Office.

The vendor shall recognize Minnesota State's sole and exclusive right to control the use of this information. The vendor further agrees it shall make no use of any of the described information, for either internal or external purposes, other than that which is directly related to the performance of the contract.

The vendor agrees to indemnify and hold harmless the State of Minnesota, Minnesota State and System Office from any and all liabilities and claims resulting from the unauthorized disclosure by the vendor, its officers, employees or agents of any information required to be held confidential under the provisions of the contract.
